DATE _____

RECD. FEB 04 2010

Why are you putting the Parabolic Mirrors on the Southwest side of Brown Road near the mountains?

In the late afternoon the mountains will start to shade the Parabolic Mirrors.

You will lose the full value of the late afternoon sun on the Parabolic Mirrors.

Also putting the Parabolic Mirrors there, I understand that you will have to move the SCE (Southern California Edison) high tension poles and you will have to rewire the poles.

Please accept my enclosed comments on the proposed Ridgecrest Solar Power Project's (RSPP) Application for Certification (09-AFC-9).

(Please print or type)
